WE ARE REAL SECURITY

Digital Business has a Security Problem

Information Security Challenges

Threats vs. Resources:

- ✓ Increased Threats and Vulnerabilities
- ✓ Cyber Talent Shortage
- ✓ Increased Costs of Security tools

"At the current rate of growth, damage from cyberattacks will amount to about \$10.5 trillion annually by 2025—a 300 percent increase from 2015 levels."
Steve Morgan, "2022 Cybersecurity Almanac: 100 facts, figures, predictions, and statistics," Cybercrime Magazine, January 19, 2022.

"A global cybersecurity talent shortage means that IT leaders often have little choice but to do business with third-party service partners."
McKinsey – October 2022

Regulatory & Board Compliance:

1. Increasing Regulatory pressure
2. Lack of Security Program Clarity

From McKinsey's client conversations:

Federal cybersecurity contracting requirements are imminent in 2023 for SMB contractors. Approximately 360,000 of them.

Non-compliance = Federal business disqualification.

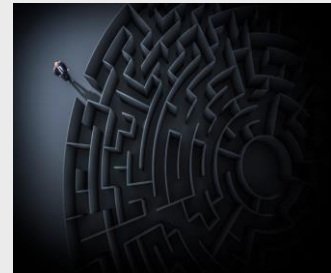

Compliance challenges grow more challenging as ecosystems proliferate.

The Department of Defense's Cybersecurity Maturity Model Certification (CMMC) requirement is beyond the reach of SMBs without help from expert vendors.

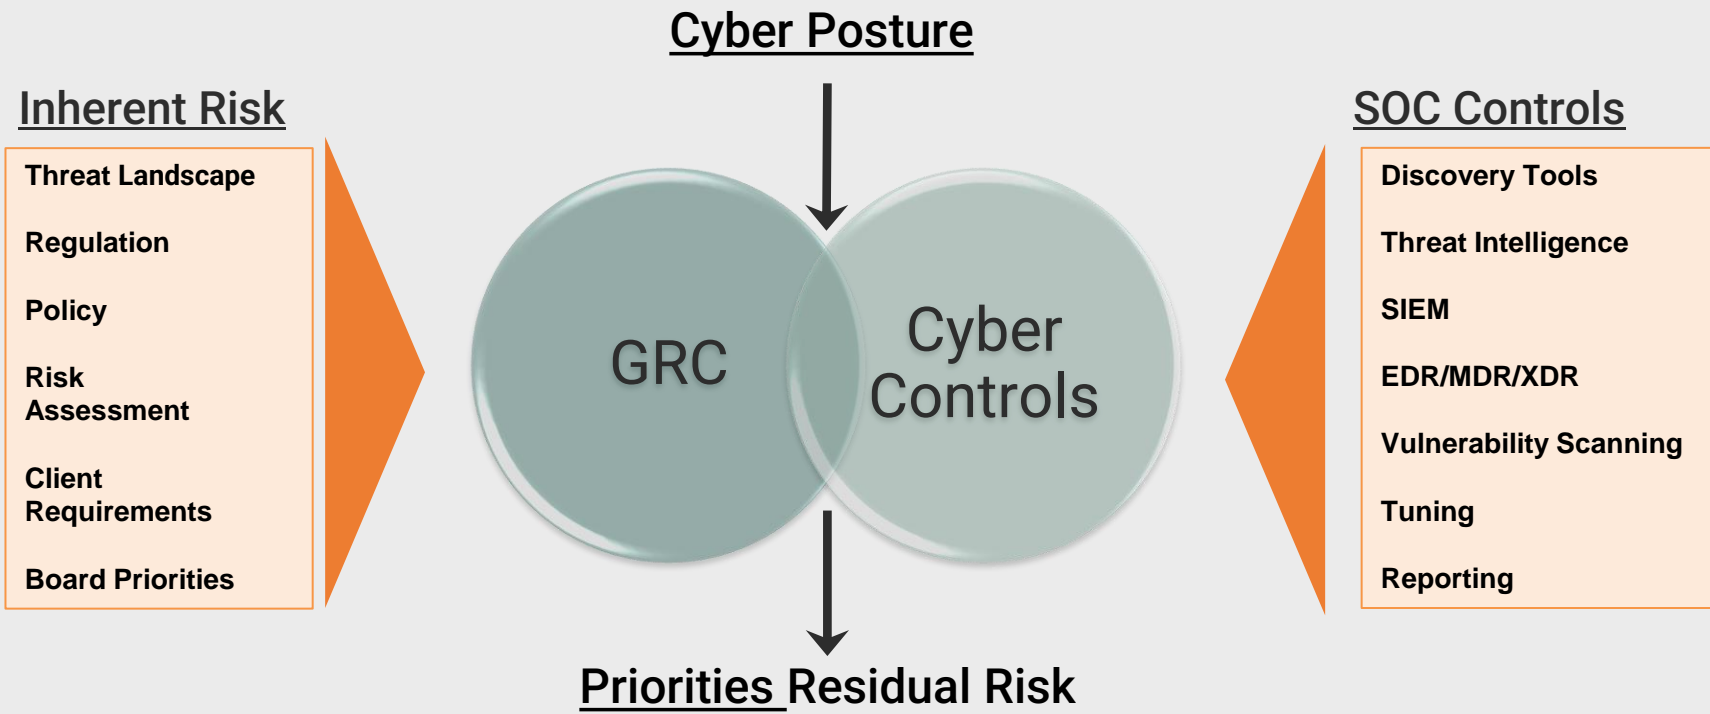

...And it's only the beginning.

Cyber Risk is Existential

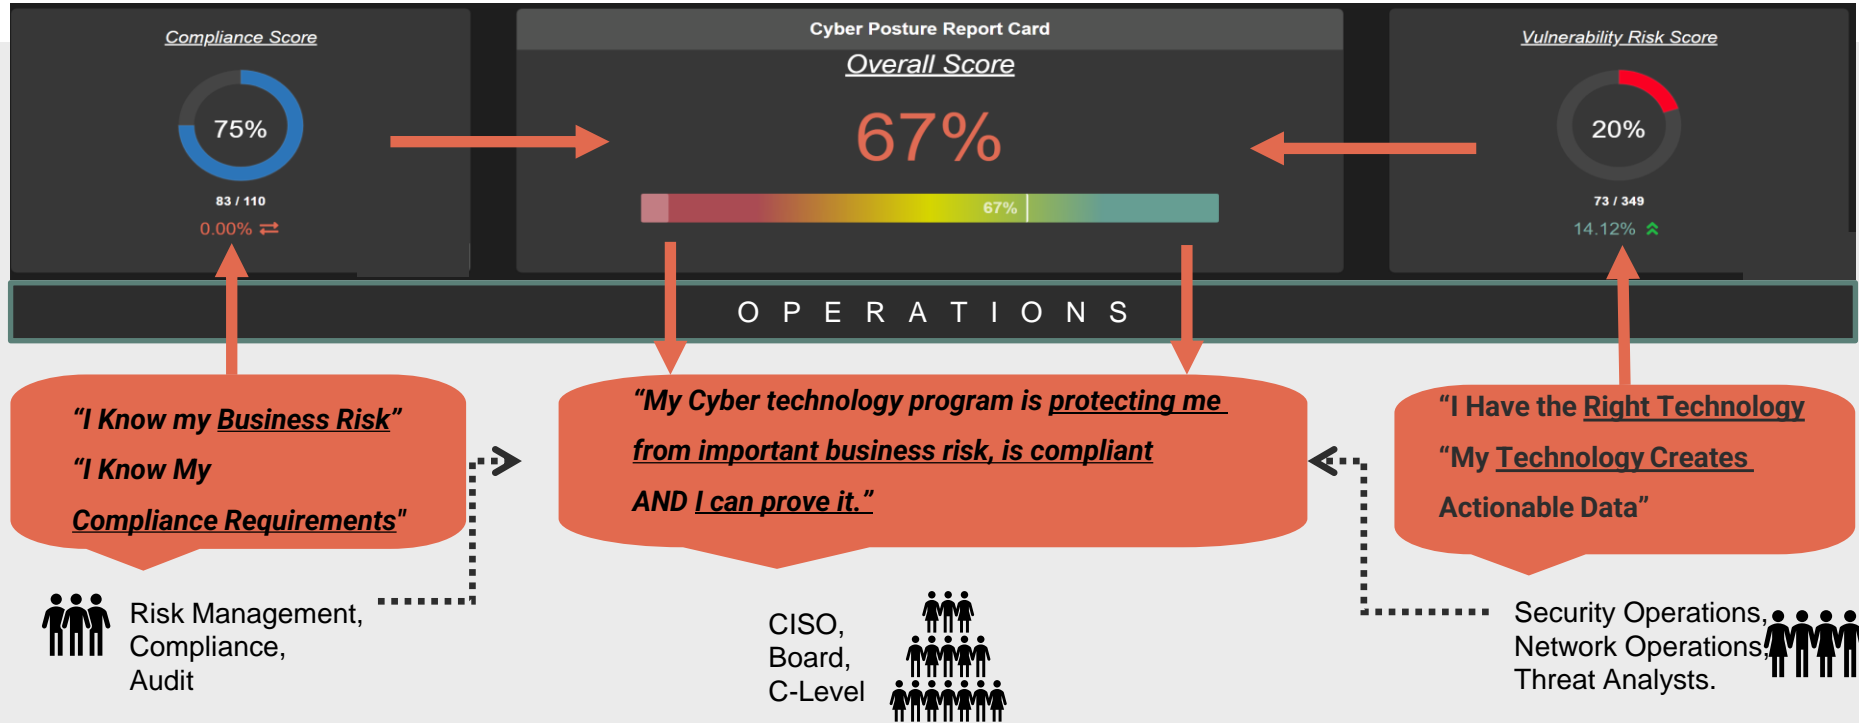

Every organization must know its cybersecurity posture in real-time

Cybersecurity Priorities - Challenging

SOLUTION : We bring the elusive, critical "Truth" Together

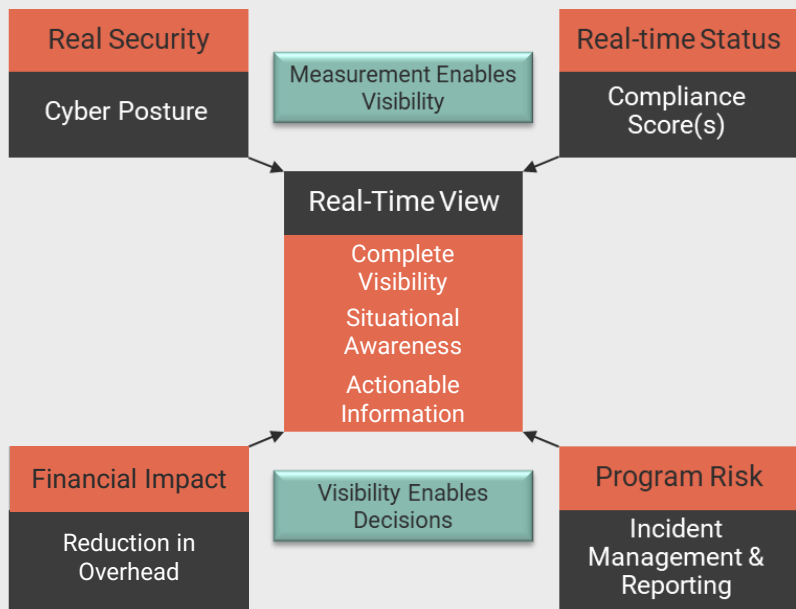

ONE Shared view = MAJOR organization cost savings

IT Security Risk Management

Standardizing, Centralizing Measurement & Visibility

If organizations fail to examine and discover blind spots in their infrastructure or services shared with others, they create risk and likely have bad actors already in their environments; these can impact both cyber compliance and cyber insurance premiums.

Per the Cybersecurity and Infrastructure Security Agency (CISA):

“Foreign adversaries, hackers, and criminals seeking to steal, compromise or alter, and destroy sensitive information can target government and industry via the contractors, sub-contractors, and suppliers at all tiers of the ICT supply chain.”

SOLUTION: Cytellix® threat management – “Easy”.

Uniquely differentiated by correlating GRC, XDR/MDR & Vulnerability

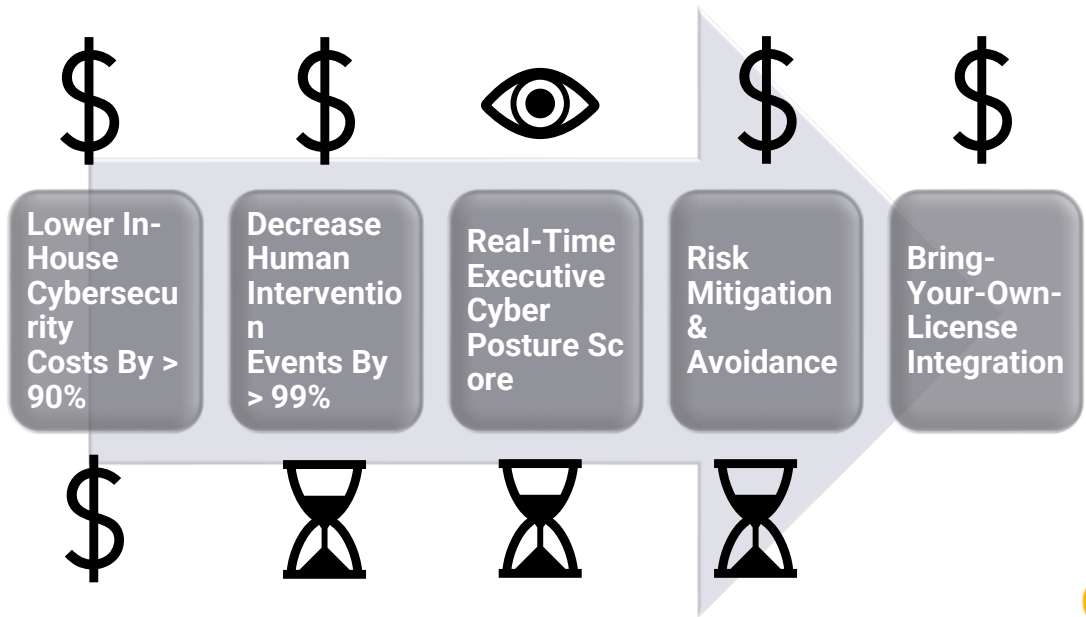

- First of its kind, patented **“Integrated Security and Risk Platform”**
 - We provide MSSP/XDR services via our USA-based SOC
 - We determine framework maturity and risk levels - GRC
 - Both are integrated in our AI/ML platform, then continuously monitored.
- DOD roots: USA based, top secret facility clearance, vastly scalable.
- Risk/Compliance assessment for any framework, NIST, CMMC, GDPR, PCI, ISO, etc.

Rapid deployment, high retention, extreme value. “Easy”.

Industry Analysts verify Cytellix is a Unique and Valuable solution for Cybersecurity – GARTNER

What do we bring to Clients?

BAE SYSTEMS

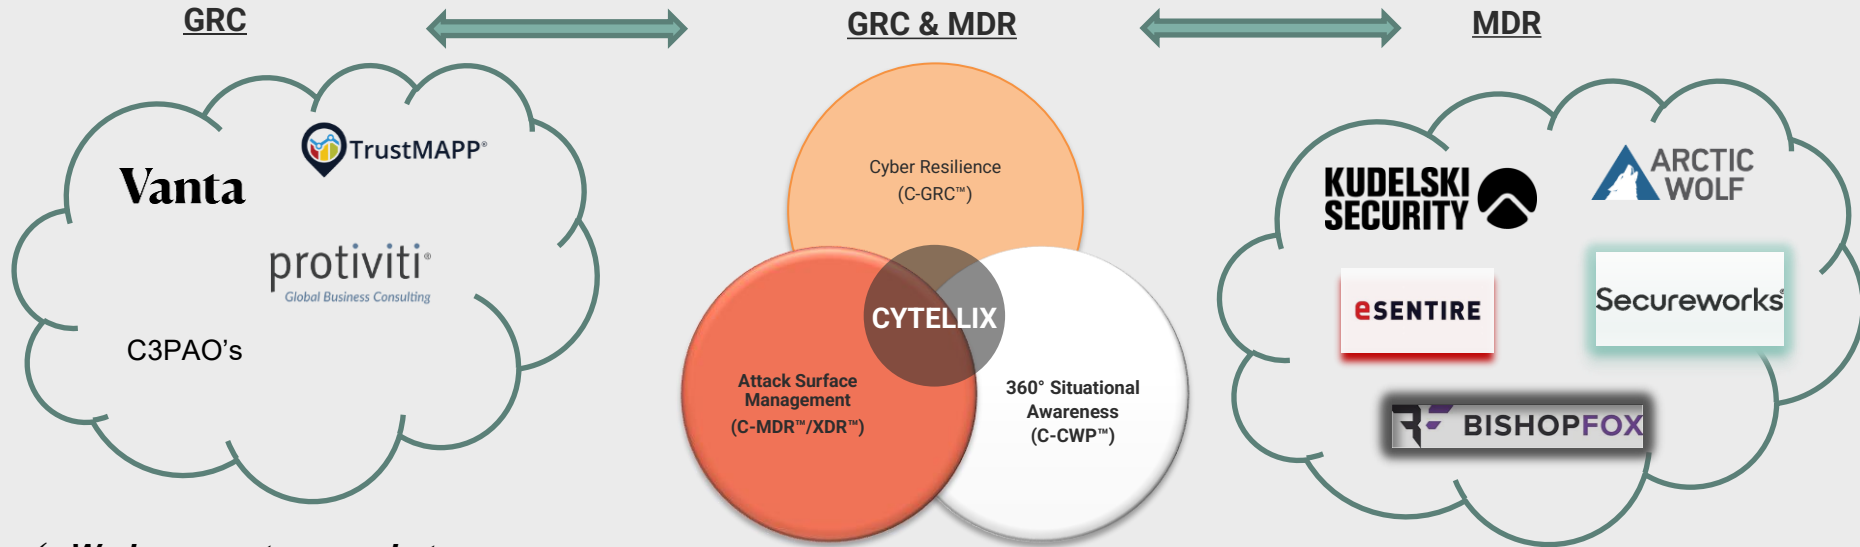

**Visionary solution,
Rapid deployment,
High effectiveness,
ALL for the price of
“tired offerings”**

COMPETITIVE LANDSCAPE:

Very large market = Many opportunities

- ✓ **We lever partner market presence.**
- ✓ **We partner well. To do what others can not provide.**
- ✓ **We compete strongly and win. On price. On capability. On ease of use.**

Experts: GRC Frameworks, Leading Cybersecurity Stacks and Cloud Platforms

BYOF and BYOL is AOK

Bring-Your-Own-Framework or License Allows Maximum Flexibility

Example GRC Frameworks

- ISO/IEC 27001
- NIST CSF, 800-53, Others
- RMF
- GDPR
- PCI-DSS
- CMMC 2.0
- NIST-SP-800-171

Partner Examples Tools and Platforms

Lift and Shift Architecture

Cloud / Multi-Cloud

On-Prem

Hybrid

Air Gapped

Product Offerings

Cytellix Cyber Watch Portal (CCWP)

GRC

- Multi-framework support (NIST, CMMC, ISO, PCI)
- Automated assessment artifact collection
- Hierarchical relationships
- Integrated with Vulnerability and Discovery (Zero-Trust), SOC Supported with 24x7x365 IP/Cloud Monitoring

MDR

- Fully managed, turnkey or BYOL, supporting Tier 1 Solutions from IBM, Microsoft, Splunk, Tenable, Firemon, Carbon Black, FireEye and others.
- Rooted in GRC for identifying threats and attack surfaces – Zero-Trust Discovery
- Interoperable with Security stacks
- Affordable and low friction

XDR

- Complete turnkey solution: Vulnerability, EDR, Discovery & GRC
- Tuned to GRC and Cyber Best Practices
- Advanced Threat Detection, Discovery, and Correlation practices provide real-time awareness and faster MTTR
- Interoperability with CRM/ITSM's
- Cost effective

Use Cases

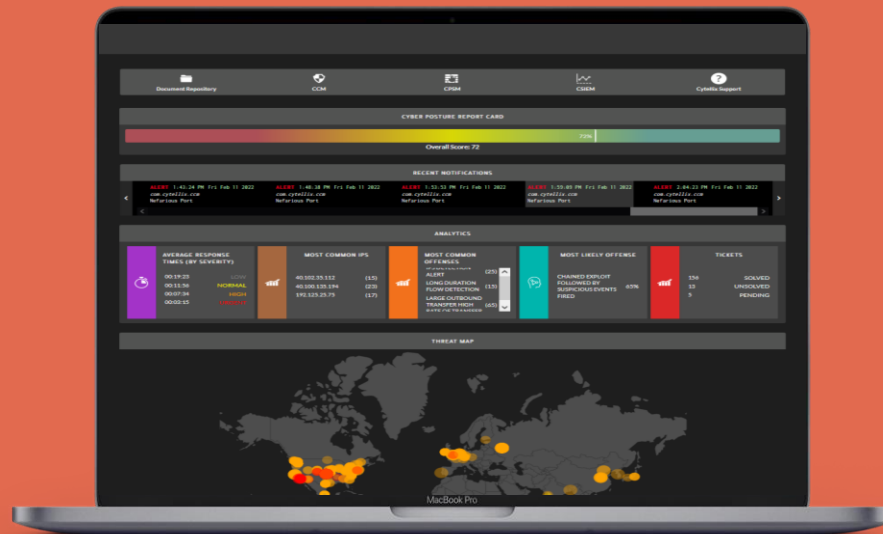

- 1) Organization needs Cyber Regulatory Processes and Solutions
- 2) Organization would like to reduce costs and improve security, visibility, discovery and cyber awareness
- 3) Organizations that want to build a cyber program and start with “understand” that can grow as their acumen and skillsets improve
- 4) Supply Chain Visibility of Cyber Posture, Discovery, Vulnerabilities and reporting in a single platform
- 5) Have a combination of Cloud, IoT, OT, On-Premise environments
- 6) Have a changing environment and require a flexible platform that can scale accordingly

Designed as a growth platform for SMB's who value a Risk Management approach to Cybersecurity

Cyrellix Cyber Watch Portal (C-CWP™)

Our cloud-based Cybersecurity Platform: Real-time visibility, monitoring and reporting functionality

- AI/ML Correlated Threat Detection
- Real-time Cyber Status and Scoring
- Discovery of Known & Unknown IP's
- Cyber assessment automation leveraging standard frameworks, gaps are correlated in threat detection
- Provides single company, multi-site, divisions and supplier cyber status
